Summary

Possessing a fervent passion for Cybersecurity and decentralized technologies, a solid foundation has been established through active engagement in CTFs, research publications, and portfolio activities. The focus centers on evaluating security controls and assessing organizational resilience, particularly where Blockchain and AI intersect with enterprise environments.

With comprehensive experience in GRC frameworks and Blue Teaming operations, problem-solving is approached through systematic analysis—identifying control gaps, measuring threat exposure, and validating remediation effectiveness. This methodology extends to everyday IT troubleshooting, where root cause analysis and evidence gathering become second nature.

Foundationally strong in scripting languages and GitHub, these capabilities support rigorous testing methodologies and control verification processes. Known for meticulous attention to detail in documentation, every engagement follows a collaborative approach balancing technical depth with stakeholder communication.

Aspiring to deepen expertise in assessing security postures and examining organizational controls across people, processes, and technology, both before incidents materialize and throughout their lifecycle. Maintaining steadfast dedication to continual professional development, ensuring analytical frameworks and technical comprehension evolve alongside emerging threat landscapes and regulatory requirements.

Experience

Ernst & Young - GDS India — Kolkata, West Bengal, India
Tech Risk Associate — June 2025 - Present

- Audited major firms on logical security assessments, information security risk evaluations, and ITGC testing.
- Executed ITGC audits covering User Access Reviews, Managed Access, Managed Change, and Managed Operations per ITIL frameworks.
- Conducted CSAE 3000 & 3416, ISAE 3000 & 3402 engagements with controls mapped to ISO 27001 and SOC 2 standards.
- Trained in DORA, NIS2, CCPA, NESA, and CRA frameworks, with working knowledge of regulatory, privacy, and cyber resilience requirements.
- Performed IPE testing to validate data integrity and reliability of system-generated reports in control testing.
- Assessed control environments via 232 and 310 forms, examining financial reporting and IT-dependent manual controls.
- Collaborated with control owners to remediate deficiencies and enhance control design effectiveness.

Website

Edunet Foundation — Remote
Cyber Security & AI Intern — 2025-01-16 to 2025-03-26

- 4-week project-based internship with technical sessions, mentorship, and collaborative AI problem solving, earning certifications from Microsoft, SAP, AICTE, and Edunet.
- 6-week Cyber Security internship combining technical sessions, mentor-led learning, and a hands-on project, earning certification from IBM Skills Build, AICTE and Edunet.

Website

Cyber Sapiens United LLP — Remote
Cyber Security Intern — 2023-02-20 to 2023-08-17

- Conducted comprehensive research on diverse subjects and tools, tested website functionality, design and usability, and delivered engaging workshops, presentations, and high-quality content across multiple domains.
- Efficiently managed multiple responsibilities while consistently meeting tight deadlines with exceptional results.

Skills

Information Security
Beginner
Network Scanning, Data Mapping, Vulnerablity Scanning, Exploit Framework, Web Security, Intel Gathering, Packet Analysis

IT Governance & Risk Management
Beginner
COBIT 5, RISK & VAL IT, ISO 31000, PCIDSS, HIPAA, IAM, AAA, ISO 27001, NIST S.P. 800-53, Controls & Policies

Digital Forensics
Beginner
Data Recovery, Steganography, Memory & Email Forensics, Diagonstics, Incident Response, Malware Analysis

Soft Skills
Communication, Adaptablity, Conflict Resolution, Creativity, Time Management, Problem Solving, Collaboration, Critical Analysis, Attention-to-detail, Teamwork

Cryptography
Beginner
PKI, Key Exchange, X.509 Digital Certificate, Ciphers, ECC, Block, Stream, Symmetric, Asymmetric, ZKP

Technologies
Beginner
Python, C, SQL, Linux, Hyperledger (Composer), Core IT Skills, Bash, MS Office Suite (Word Excel Powerpoint), GenAI

Networking
Beginner
TCP/IP & OSI Model, Firewalls, HTTPS/TLS, SSL, DNS, UDP Protocols, IPv4 Subnetting, Signals

Web Developement
Beginner
HTML 5, CSS 3, Canva Websites , Github Pages, Typescript

Certifications

Security+ (Plus) SY0-701 2025-07-13
CompTIA
A vendor-neutral, foundational cybersecurity certification that validates essential skills across multiple domains, valued by IT security professionals and often required for cybersecurity roles.
Badge

Certified in Cybersecurity℠ 2023-01-06
ISC2
The program provides professionals with globally recognized cybersecurity skills, covering risk management, incident response, and governance for entry-level roles positions.
Badge

Cisco CyberOps (CBROPS v1) 2025-01-15
Cisco NetAcad
This course trains and validates SOC analysts' skills in security monitoring, host and network analysis, incident response, and security tools through hands-on labs.
Badge

ISO/IEC 27001:2022 Lead Auditor 2025-05-26
Mastermind Assurance
This course offered by Mastermind Assurance is a self-paced, expert-led training program designed to equip professionals with advanced skills in auditing ISMS.
Badge

Product Management Professional Certificate November 2024
NASBA; IIBA; PMI; AHA; Linkedin Learning
The certificate, provides foundational knowledge in product management, covering topics such as product development stages, strategy setting, and roadmap creation.
Certificate

Google Cloud Career Practitioner 2023-02-15
Google Developer Student Club - FET JU

This Program is an initiative that provides learners with practical skills in cloud computing through hands-on experience with Google Cloud Platform (GCP) modules, labs, and exercises
Certificate

Projects

Portfolio Activity July 2022 to Present
I built a strong cybersecurity portfolio through Forage and Security Team Blue activities, the Google Cybersecurity Professional Certification, and hands-on experience from my bachelor's in information security.
Website

Bootcamp Projects October 2024 to Present
We completed multiple-domain focused projects as part of different boot camps during the specified duration, gaining hands-on experience in blockchain & genAI technologies.
Details

Internship Projects January to March 2025
I undertook two significant projects: one on AI, and the other on cybersecurity, which provided practical exposure to these critical domains, enhancing my technical proficiency and problem-solving abilities.
Details

ClinicalGPT Medical Assistant March to April 2025
A sophisticated medical assistant application that combines large language models with trusted medical sources to provide accurate medical information and analysis.
Github Repository

Affiliations

AWS Community Builder March 2025 to Present

Acheivements

Best Original Research Award September 2025
Blockchain in Healthcare Today (BHTY)
Our research article was recognized for its significant global impact in healthcare and technology, measured by high views, downloads, and scholarly citations.
Certificates

Squad Extraordinate & GDS User Recognition October 2025
EY GDS India — Canada Pool
We got recognized for our outstanding dedication and teamwork in closing all controls, setting an example of EY's high-performing teams, while I was also recognized individually for personal contributions.
Certificates
